INCREASING RELEVANCE OF YOGA

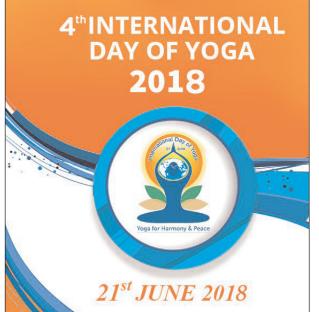

Dr. David Frawley

018 marks the fourth ✓ International Yoga Day since its inception in 2015 by the United Nations. It has now become an important annual global event and special day in India overall. Each year marks additional progress in spreading the practice and study of Yoga and its entrance into schools, businesses and all walks of life. It is important to keep this momentum going as Yoga holds the key to the transformation of human life to a higher level of awareness.

India is not just a country but a great dharmic civilization rooted in Yoga practice and Yoga philosophy since the most ancient times. It looks back to great Yogis and Rishis as its gurus and guides and highest role models. The teacher or deity in a sitting meditation pose, whether

Lord Shiva or Lord Buddha, is the dominant art form or image in India has that spread throughout Asia and to the entire world.

Yoga is India's great civilizational gift to the world and it is important for India to continue to nourish its yogic roots. Yoga of some sort can be found pervading the entire culture of India, from a local village level to a broad national and international level. This includes a yogic influence on music, dance, art, science. medicine. philosophy, politics and economics, including in the spiritual realm where Yoga always excels. Skill in action, focus in perception, steady direction of energy, determination of effort, and excellence in achievement, along with inner composure and calm are all aspects of Yoga. Such yogic attitudes can help us grow and develop in life and unfold our highest personal and

potential. We human should instill this at a young age as an important part of personal and social development.

All aspects of Yoga should go together. Our body is a temple for the deity that is our own inmost consciousness. Everything we do should play a proper role in the cosmic order.

Yoga is important as a way of life, self-education and character building. It helps us properly use and master our body, senses and mind, including control of our attention, thoughts and emotions. Yoga should be an integral part of our lives and

educational systems and sustained learning for the whole of our lives, starting when we are young. A yogic discipline is ideal to prepare us for all the challenges of life.

Yoga arises originally from nature and teaches us to live in harmony with the Earth and the universe as a whole. It is not simply a manmade or historical invention, but a means of integration into the cosmic life. Yoga is inherently an ecological pursuit and promotes ecological awareness, concern for the environment, respecting the Earth and all of its creatures, large and small. It affords us a planetary vision in which we look at the world as a whole, not as divided into conflicting countries and communities. The Different Aspects of Yoga

Each of the eight limbs of traditional Yoga has its particular value

relevance. We will discuss these briefly for a broader understanding of the scope of what Yoga can do for us.

Yoga begins with yogic values and principles in attitudes behavior, which means kindness, compassion, humility, respect, courage and detachment. Yoga has its specific dharmic code of yamas and niyamas, principles and practices of dharmic living. This is the ideal foundation for the human values that we should develop in life, starting at a young age.

For a quick overview of the yamas: Ahimsa or non-harming reducing the harm going on in the world; Satya promoting truth in thought, word and deep; Brahmacharya or control of our senses and bodily urges; Asteya or not

ow often have we all might heard parents warning their children, while moving out from their home for some work, so repeatedly, "Dhyaan se chalna, apne swasthya ka dhyaan rakhna, dhyaan se rahna, dhyaan se kaam karna, khana, pina and so many other things"? (Take care while moving, Take care of your health, live your life carefully, mind your work, food, water etc.) So what does the word "dhyaan" imply in the above context?

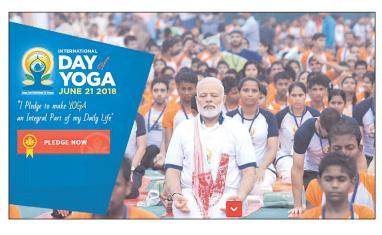

In fact, it is nothing but the synonym of meditation which literally means giving full attention to something as a part of spiritual activity or as the modus operandi of calming or relaxing one's mind. In fact, dhyaan is the most integral, innate and inherent part of lives of the Homo sapiens. It cannot be enforced from outside nor can it be separated from the lives of human beings. That is why meditation, one of the most essential components of Yoga, is nothing but a way of life; it is the

most essential part of life along

the line of air, water and soil.

The history of Yoga, as an ancient divine practice and considered to be evolved during the pre-Vedic period of circa 3000

In Rig Veda, yoga is popularly described as the science of Chitta Vritti Nirodha, the science of stilling the mind's vicissitudes, mind's fickleness, and mind's whimsy. It also means calming the turbulent mind and uniting the mind with the divine soul. The

regular practice of yoga has now proved to be the panacea of entire gamut of physical and mental disorders and ills which human beings find themselves

most vulnerable to suffer from. Yoga as a science of impeccable therapy is reckoned as the historic gift of ancient civilization to the new generation of the modern world and keeping in view the importance of this discipline, Prime Minister Shri Narendra Modi proposed the idea of International Day of Yoga at the United Nations General Assembly on the 27th September 2014. Following this proposal the Nations Assembly declared 21st June as the International Day of Yoga. The maiden International Day of Yoga was observed across the globe on the 21st June 2015. The science of Yoga is an epochmaking school, it is a timeless philosophy, it is a great mystic the halo of which transcends the boundaries, religions and cults of the nations.
