TRANSFORMING NORTH-EAST THROUGH DEVELOPMENT INITIATIVES

Deepak Dewan

The 67th Plenary Session of North Eastern Council (NEC) in Shillong in July this year gave further boost to the ongoing development activities in the region. This was the first meeting of the North Eastern Council under the Chairmanship of The Union Home Minister Shri Rajnath Singh. It may be mentioned here that in June, 2018 the Union Cabinet chaired by the Prime Minister Shri Narendra Modi had approved the proposal for nomination of the Union Home Minister as ex-officio Chairman of the North Eastern Council and also repositioned the Development of North East Region (DoNER) Minister, Dr Jitender Singh, as its Vice-Chairman.

While speaking at the Plenary Session which was attended by the DoNER Minister, Governors, Chief Ministers and senior officers of the eight North Eastern States, Home Minister Shri Raj Nath Singh said that the road to "New India" will go through a

Prime Minister Shri Narendra Modi

developed and peaceful "New North East". He further said that the "New North East" will emerge with better road connectivity and Information Technology which will generate

employment opportunities for the youth closer to their homes. Employment and income generation will counter the problems like insurgency in the region. He further stressed on the need to

create a safe environment in order to attract investors.

Mizoram, being one of the peaceful States in the region has bagged first foreign collaboration in the field of food processing. A Centre for Agriculture, with collaboration of Israeli expertise was inaugurated in March, 2018 in Mizoram. This is first such Centre in the entire North East Region established with the Israeli collaboration. This Centre is exclusively meant for the processing of citrus fruits. Though located in Mizoram, this Centre is going to cater to the entire region. This Centre will benefit and encourage the farmers in the entire North East region engaged in horticulture.

Centre's quest to develop the North East Region at par with the rest of India also made Government of India to constitute a separate NITI Forum for North East in February 2018 with the aim to ensure sustainable economic growth of the region. The Secretariat for the Forum has been established in the

EMERGING OPPORTUNITIES FOR STARTUPS IN BIOTECHNOLOGY SECTOR

Ankita Rani

Startups are the centers of innovation and are a great way to enhance employment creation in the economy and India needs around 6 to 7 million jobs a year and global data shows that it is startups, not large enterprises that create net new jobs in any country. Prime Minister of India, Shri Narendra Modi formally launched the "Start-up India" initiative on January 16, 2016 at Vigyan Bhawan, New Delhi. This initiative aims at fostering entrepreneurship and promoting innovation by creating an ecosystem that is conducive for growth of Startups. The objective is that India must become a nation of job creators instead of being a nation of job seekers. The Startup India by Prime Minister of India has already brought lots of positivity among the entrepreneurs in India. Industry

is elated by the fact that India has the third largest number of startups globally. Fostering a fruitful culture of innovation in the country is a long and important journey. This initiative will go a significant way in reiterating Government of India's commitment to making India the hub of innovation, design and Startups.

The Indian Biotechnology sector is gaining global visibility and is being tracked for emerging investment opportunities. The sector is divided into five major segments - Bio-pharma, Bio-services, Bio-agri, Bio-industrial, and Bio-informatics. The biopharmaceutical sector accounts for the largest share of the biotech industry with a share of 64% of total revenues, followed by bio-services with 18% market share. India is becoming a leading destination for clinical trials, contract

research, and manufacturing activities, which is further fueling the growth of the bio-services sector. Bio-agri segments accounted for 14% of the biotech industry in 2015-16, while the remaining market is catered by bio-industrial (3%) and bio-informatics (1%). For a country like India, biotechnology is a powerful enabling technology that can revolutionize agriculture, healthcare, industrial processing and environmental sustainability.

The Indian biotechnology sector has, over the last two decades, taken shape through a number of scattered and sporadic academic and industrial initiatives. Biotech industry is expected to grow at 30.46 percent CAGR to reach USD 100 billion by 2025. The Biotechnology Industry in India has grown from \$1.1 billion in 2005 to \$7 billion in 2015 and is expected to reach \$11.6 billion

by the end of 2018.

Presently, key drivers for growth in the biotech sector are increasing investments, outsourcing activities, exports and the government's focus on the sector. 100% Foreign Direct Investment (FDI) is allowed under the automatic route for greenfield pharma. 100% Foreign Direct Investment (FDI) is allowed under the government route for brownfield pharma in upto 74% FDI is under automatic route and beyond 74% is under government approval route. FDI up to 100% is allowed under the automatic route for the manufacturing of medical devices.

Startups are essentially of two kinds. One that starts something ground up, something that no one has thought about and is often ground breaking. This type of

DoNER Ministry and representatives from all North Eastern States, their Chief Secretaries and Secretaries of concerned Central Ministries besides Directors of institutions like IIT and IIM and experts as members. The first meeting of NITI Forum took place in Agartala on April 10, 2018. It was co-chaired by the DoNER Minister and Vice -Chairman, NITI Ayog, Shri Rajeev Kumar. In his address, Shri Rajeev Kumar outlined the focus of development projects based in the concept of " HIRA" (Highways, Inland Waterways, Railways and Airways) as spelled out by the Prime Minister Shri Narendra Modi.

He further outlined the areas of emphasis as Education, Health and Skill development, Horticulture, Tourism, Food Processing and use of Bamboo in North East. All these are to be developed in a time bound manner.

The agenda for the NITI forum also included strategies for improving Road, Rail and Air Connectivity, Realizing the Hydre Dream- way forward for utilizing existing potential for hydro-power in the region, Agriculture and allied sectors like Organic farming, cultivation of vegetables, fruits, spices, medicinal plants, soil health cards for farmers, minimizing post harvest losses, increased coverage under crop insurance, boosting milk production, early completion of

on-going irrigation projects, promotion of eco-tourism , rural tourism, adventure tourism, strengthening of North East Tourism Development Council (NETDC).

Another major decision taken by the Centre to boost the economy in the region is the amendment of the 90 year old Indian Forest Act of 1927 enacted by the British which defined Bamboo as a

"Tree". The Union Cabinet chaired by the Prime Minister Shri Narendra Modi changed the Act thereby doing away the obtaining of permit system to cut bamboo from non forest land for economic activities. This move has been welcomed by the scores of north easterners who feel that this would open new avenues of jobs and

entrepreneurship for non-farmers also. Modi Government yet took another major decision to provide 100% funding by Central Government for projects in the North East Region which were earlier being taken on the basis of Centre-State sharing in the ratio of 90:10. Most of the North Eastern States depend on the grant from Centre and were not able to generate their own 10% share.

In another major initiative a Memorandum of Under-standing was signed last year between the North Eastern Council and Development Commissioner (Handicrafts), Ministry of Textiles to harness the hidden potential of Cane and Bamboo of North East region. The MoU provided a push for the integrated and inclusive development of Cane

and Bamboo Sector of North East Region by way of skilled manpower, technology dissemination, marketing support and institutional support required for the holistic development of which can coordinate a mission to mobilize masses and promote Bamboo sector as a whole throughout the country.

The North Eastern Council and the Development Commissioner (Handicrafts) have taken up the task of promoting Cane and Bamboo Technology Centre, Assam and the bamboo and Cane Development Institute, Tripura as the centres of excellence not only in the region or in the country but also in South East Asia.

Some of the major multi-lateral projects which will link North East with the neighbouring countries including South East area are Kaladan Multi-Model Transit Transport Project, the India - Myanmar -Thailand Trilateral Highway Project, Rhi-Tiddim Road project and Tamu - Mandalay Road Project. Similarly the 15.06 kilometer rail line project between Agartala - Akhaura (Bangladesh) which is part of the Trans-Asian Railway Net-work is under construction. Once completed, the travel time between Kolkata and Agartala will reduce considerably besides providing economic avenues to the people of Tripura and also to the rest of North East.

As part of the upgradation approximately 4,800 KMs of roads have been sanctioned in the region and almost 30% of the NEC'S budget is dedicated towards improving the transport and communication infrastructure in the North East region.

Under the Bharatmala Pariyojana, 5,301 Kilometers of roads have been approved for improvement, out of which 3,246 kilometers of roads come under the Economic Corridor in North East project. Nine of the eleven Inter-State Bus Terminus (ISBT) have been completed. Three Inter State Truck Terminus, two in Assam and One in Nagaland have been completed and one in Tripura is under construction.

Another major initiative in the region is Shipping and Inland Waterways. Develop-ment of Barak river is taken up in two phases for shipping and navigational purposes. In Phase 1, development of 71 kilometer stretch between Bhanga and Silchar with up gradation of terminals at Karimganj and Badarpur, is taken up. Dredging work of Barak river began in November 2017 and is still on. In Phase -11, develop-ment of 50 kilometers stretch between Silchar and Lakhimpur will be taken up.

Work for construction of three hangers and apron at Guwahati Airport and extension of apron at Jorhat Airport have been completed and work on three

startup is difficult to create but once created often sees unprecedented growth. The second kind of startups are primarily the ones who do not want to reinvent the wheel. They are akin to adding old wine in a new bottle to create something new and innovative.

Entrepreneurship and startups are only a recent phenomenon in the country. Doing a startup is tough and every country sees more failures than success. More often than not, an entrepreneur needs to be prepared to face failures and unprecedented hardship. Entrepreneurship thrives on celebrations and a society that fails to appreciate business failures stifles innovation and creativity even before it can start. Failures often teach an entrepreneur, what to do and what not to do.

Financing challenges for startups in India

Most of the first generation entrepreneurs across the country are applauding the government's efforts to recognize their business ventures under the banner of Startup India, but for most challenges of funding, patents and creation of intellectual property remain. Around 90 percent of funding for startups, at present, comes from foreign venture capitals and domestic financiers could change the nature of innovation as well. A recent study by Grant Thornton revealed that in 2015 more than 600 such companies got funding, with over \$2 billion deployed by PE and VC funds.

According to a recent study, over 94% of new businesses fail during first year of operation. Lack of funding turns to be one of the common reasons. Money is the bloodline of any business. The

long, painstaking yet exciting journey from the idea to revenue generating business needs a fuel named capital. That is why, at almost every stage of the business, entrepreneurs find themselves asking - How do I finance my startup? There are various funding mechanisms available in the market for startups.

Here are some of the Innovative funding methods for Startups in India:-

1- Pradhan Mantri Micro Units Development and Refinance Agency Limited (MUDRA)- Started with an initial corpus of Rs. 20,000 crore to extend benefits to around 10 lakhs SMEs. You can submit your business plan and once approved, the loan gets sanctioned. You get a MUDRA Card, which is like a credit card, which can be used to purchase raw materials, other expenses etc. Shishu, Kishor and Tarun are three categories of loans available under the promising scheme.

2- Bootstrapping or self funding- Self-funding, also known as bootstrapping, is an effective way of startup financing, especially when you are just starting your business. First-time entrepreneurs often have trouble getting funding without first showing some traction and a plan for potential success.

3- Crowd funding- Crowd funding is like taking a loan, pre-order, contribution or investments from more than one person at the same time. In this a startup will put up a detailed description of his business on a crowd funding platform. He will mention the goals of his business, plans for making a profit, how much funding he

needs and for what reasons, etc. and then consumers can read about the business and give money if they like the idea. Those giving money will make online pledges with the promise of pre-buying the product or giving a donation. Anyone can contribute money toward helping a business that they really believe in.

4- Angel Investment - Angel investors are individuals with surplus cash and a keen interest to invest in upcoming startups. They also work in groups of networks to collectively screen the proposals before investing. They can also offer mentoring or advice alongside capital. Angel investors have helped to start many prominent companies, including Google, Yahoo and Alibaba. This alternative form of investing generally occurs in a company's early stages of growth, with investors expecting upto 30% equity. They prefer to take more risks in investment for higher returns.

5- Venture Capital - Venture capitals are professionally managed funds who invest in companies that have huge potential. They usually invest in a business against equity and exit when there is an IPO or an acquisition. They provide expertise, mentorship and act as a litmus test of where the organisation is going, evaluating the business from the sustainability and scalability point of view.

6- Business Incubators & Accelerators- Early stage businesses can consider Incubator and Accelerator programs as a funding option. Found in almost

every major city, these programs assist hundreds of startup businesses every year. Incubators are like a parent to a child, who nurture the business providing shelter tools and training and network to a business. Accelerators are more or less the same thing, but an incubator helps/assists/nurtures a business to walk, while accelerator helps to run/ take a giant leap.

7- Microfinance Providers or NBFCs- Microfinance is basically access of financial services to those who would not have access to conventional banking services. It is increasingly becoming popular for those whose requirements are limited and credit ratings not favoured by bank. Similarly, NBFCs or Non Banking Financial Corporations are corporations that provide banking services without meeting legal requirement/ definition of a bank.

Thus it can be concluded that with all the support from Government of India and the kind of ecosystem that has been created in last three years, there are huge opportunities for startups in biotechnology sector. When the first generation of biotechnology startups began to be formed 20 years ago, India's initial set of companies were set up either by scientists who had no business experience, or by entrepreneurs with business backgrounds. But now, there are also a diverse bunch of startup entrepreneurs who are setting up companies in:-

*regenerative medicine
*new methods of drug delivery
*novel biocompatible materials
*molecular diagnostics

*nutrition
*sustainable energy and agriculture

Many of the engineering startups are trying to solve healthcare and agriculture problems, thereby stretching the definition of biotechnology. Others develop products vital for biotech research. In the past decade, the definition of biotechnology has become broader, with the merging of engineering and biology, and the rise of medical technology companies. Conventional biotechnology has expanded too, especially with emergence of agri-biotech startups. Agriculture is now a hot area for investments by large companies and venture capitalists.

Though there are challenges in this sector but still there are many startup entrepreneurs in the biotechnology space, who are doing exceptionally well. Government of India is providing a lot of support through initiatives like DBT, DST, CSIR, and BIRAC who are pumping a generous amount of money within the biotechnology startup ecosystem.

Finally, it can be summarized that emerging Startup companies in biotechnology space are the most dynamic economic organizations in the market, since they provide additional dynamics and competitiveness to any economic system. They act as catalytic agents for change, which results in chain reaction and the process of industrialization is set in motion.

other Airports is near completion. Work on Tezu Airport in Arunachal Pradesh is almost completed. Foundation stone for the new Integrated Terminal Building at Guwahati was also laid and the work has started. The Ministry of Civil Aviation has approved 92 new air routes in the North East Region which will be introduced in the second round of Udan scheme. Construction work of the new Greenfield Airport at Pakyong, Sikkim, is completed.

The age old Meter Gauge rail tracks have been replaced by modern day Broad Gauge. 970 kilometers of tracks were converted in the last 4 years. Railways have also connected Arunachal Pradesh, Tripura, Manipur and Mizoram to its

network and is further expanding the tracks to reach some of the State capitals. In fact now prestigious Rajdhani Express operates twice a week from Delhi to Naharlagun, Arunachal Pradesh.

Another success story of North Eastern Council's various projects is North Eastern Community Resource Management Project (NERCORMP) which has transformed over 1,19,000 women living in the rural areas. NERCORMP is a sustainable Livelihood Project with support from International Fund for Agricultural Development (IFAD). Under this project 6 most inaccessible remote hill districts in Assam, Meghalaya and Manipur were covered to reach 1,326 villages. Later 5 more backward districts, Tirap, Changlang and Longding in Arunachal Pradesh and

Chandel and Churachandpur in Manipur were tapped to reach out to 1,177 villages.

A 60 MW Tuirial Hydro Electric Power with the cost of 913.63 crore was completed in Mizoram and is operational now. North Eastern Council also supported the installation of 694.5 MW power plants and laying of 2,540.41 Km of transmission and distribution lines in the region.

The Dhola-Sadiya bridge which was inaugurated by the Prime Minister Shri Narendra Modi on May 26 last year has become a symbol of Centre's commitment to bridge the gap and bring the New North East in the forefront of New India.

INDIAN CUSTOMS

www.jobriya.com

UNPRECEDENTED TAX REFORM Enhanced Ease of Doing Business

Indian Customs has taken a series of measures to simplify Customs processes and procedures during the last few years.

Reforms undertaken since April, 2017

- An online paperless processing application, E-SANCHIT, allowing trader to submit all supporting documents for clearance of consignments electronically has been introduced. There is no need to approach different regulatory agencies with hard copy of documents.
- Enhanced facilitation through Risk Management System has resulted in lesser time taken for clearances.
- Direct Port Delivery (DPD) allows registered importers to complete Customs clearances at the terminal itself and containers can be taken directly to factories without going to CFS.
- Direct Port Entry (DPE) allows direct entry of export cargo into port terminal without any need for going to CFS.
- Authorized Economic Operator (AEO) scheme provides faster Customs clearances and simplified Customs procedures to business entities. Already more than 1700 entities are getting benefits under it.
- Mandatory filling of Bill of Entry within specified time has resulted in discipline among the trade and resulted in reduced time in case of imports.
- E-sealing of containers has been introduced replacing earlier practice of supervised sealing by departmental officers. It has enhanced the integrity of cargo as RFID tamper-proof e-seals are being used to seal containers now.

Reforms undertaken during 2016-17

- Single Window Interface for Facilitating Trade (SWIFT) eases the NOC issuance procedures for 6 main Governmental Agencies and allows importers & exporters, the facility to lodge their clearance documents online at only a single point.
- Only 3 mandatory documents now required for import/ export which includes Bill of Lading/Airway Bill, Commercial Invoice-cum-Packing List and Shipping Bill / Bill of Entry from the earlier obligatory 10 documents.
- Based on the principle of 'Clear first-Pay later', facility of deferred payment of Customs duty is available. This helps to achieve seamless Wharf to Warehouse transit in order to facilitate just-in-time manufacturing. Currently being extended to importers holding AEO T-2 or T-3 status.
- 24x7 Customs Clearance facility extended to goods covered by facilitated Bills of Entry and goods shipped under Free Shipping Bills at designated Seaports & Air Cargo Complexes.
- National Committee on Trade Facilitation (NCTF) is an effective deliberative and decision-making structure. With its three-tiered composition and with representatives from trade and various governmental agencies on board, NCTF helps to ease bottlenecks for faster and streamlined clearance of goods.
- Customs Clearance Facilitation Committees (CCFCs) have been set up under the chairmanship of Chief Commissioner of Customs/Commissioner of Customs. CCFCs expedite clearance of import and export goods and help resolve grievances of trade and industry at various seaports, airports, ICDs and LCSs.

The overall impact of above reforms in terms of time and cost associated with imports and exports can be judged from the Time Release Study (TRS) 2018 data conducted at JNCH, Mumbai as under:

- The percentage of cases of filling Advance Bill of Entry has increased to more than 58%.
- The average release time for imports has improved to 144.18 hours in 2018.
- The average release time for DPD facilitated Bills of Entry is 84.48 hours.
- In case of Bills of Entry for auto-components falling under Customs Tariff Heading 8708, the average release time is 91.52 hours.
- The net average export release time, arrived at by excluding the domestic transport time from the gross average export release time is 84.1 hours.

Importers and Exporters can track their documents and containers on ICEGATE website.

- The location of container can be traced using facility "Track your Container" on www.icegate.gov.in for cargo moving to Nhava Sheva, Hazira and Mundra Ports only.
- The current status of Bill of Entry or Shipping Bill can be traced by logging into the ICEGATE website.
- Already electronic tracking of Nepal-bound cargo has been launched by Customs.
