ENERGY CONSERVATION IN INDIA

Sushil Chandra Tripathi & Lydia Powell

Energy conservation may be defined broadly as the efficient use of energy. It may be achieved by using less energy to generate a given amount of work or by avoiding the use of energy (for example by using insulation in buildings to avoid energy for heating and cooling). Globally energy conservation has tremendous potential to boost economic growth and avoid Greenhouse Gas (GHG) emissions. India embarked on implementing energy conservation measures more than two decades ago and has since established a clear policy architecture for promoting energy conservation. Many of its initiatives have resulted in substantial energy saving and consequently lowered carbon dioxide (CO₂) emissions.

Energy Conservation in India

India’s energy consumption of about 916 million tonnes of oil equivalent (mtoe) in 2018 is expected to double by 2040 if policies in place currently are implemented. Though China will remain the world’s largest energy consumer for the foreseeable future, India is likely to be the largest source of energy demand growth in the next two decades adding 378 mtoe to energy demand. In 2018 India, China, and the United States accounted for 70 percent of the total energy demand growth of 2.3 percent. Growth in energy demand would also mean that India’s CO₂ emissions will increase from 2.3 giga tonnes (Gt) per year currently to over 4.8 Gt in 2050 with 3.3 Gt per year coming from coal use alone.

It has been estimated that nearly 25,000 MW can be saved by implementing end-use energy efficiency and demand side management measures throughout India. Efficient use of energy and its conservation assumes even greater importance in view of the fact that one unit of energy saved at the consumption level reduces the need for fresh capacity creation by 2 times to 2.5 times. Further, such saving through efficient use of energy can be achieved at less than one-fifth the cost of fresh capacity creation. Energy efficiency would, therefore, significantly supplement India’s efforts to meet power requirement, apart from reducing fossil fuel consumption.

The Energy Conservation Act

India enacted the Energy Conservation (EC) Act in 2001. The Act provides the regulatory mandate for standards & labelling of equipment and appliances; energy conservation building codes for commercial buildings; and energy consumption norms for energy intensive industries. The Act also directs states to designate agencies for the implementation of the Act and for promotion of energy efficiency. The Bureau of Energy Efficiency (BEE) was established under the EC Act in 2002 under the EC Act. The mission of the BEE is to assist in developing policies and strategies with a thrust on self-regulation and market principles, within the overall framework of the Act with the primary objective of reducing energy intensity (conservation of energy) of the Indian economy.

The Ministry of Power, through the BEE has initiated a number of energy efficiency initiatives in the areas of household lighting, commercial buildings, standards and labelling of appliances, demand side management in agriculture/ municipalities, Small and medium enterprises (SMEs) and large industries including the initiation of the process for development of energy consumption norms for industrial sub sectors.

The Government in consultation with the BEE has notified the Perform, Achieve and Trade (PAT) scheme under National Mission for Enhanced Energy Efficiency (NMEEE). NMEEE is one of India’s eight missions under the National Action Plan on Climate Change (NAPCC). NMEEE aims to strengthen the market for energy efficiency by creating conducive regulatory and policy regime and has envisaged fostering innovative and sustainable business models to the energy efficiency sector. The NMEEE has four key initiatives underlined below:

1. The Perform Achieve and Trade Scheme (PAT) is a market based mechanism to enhance the cost effectiveness in improving the energy efficiency in energy intensive industries through certification of energy saving which can be traded.

2. More than 400 entities in energy intensive sectors (aluminium, cement, chlorine-alkali, fertilizer, iron & steel, paper & pulp, thermal power, textile) were mandated to reduce their specific energy consumption (SEC) i.e. energy used per unit of production under the first cycle of the programme. Under this cycle of PAT energy saving of almost 1.25 per cent of India’s primary energy consumption equivalent to 8.67 mtoe was achieved. Greater savings are expected in the second cycle that would cover larger number of industries.

3. The Market Transformation for Energy Efficiency (MTEE) aims to accelerate the shift to energy efficient appliances in designated sectors through innovative measures to make the products more affordable. Under MTEE, two programmes have been developed i.e. Bachat Lam Yojana (BLY) and Super-Efficient Equipment Programme (SEEP).

The BLY is a public-private partnership program comprising of BEE, distribution companies (discoms) and private investors to accelerate market transformation in energy efficient lighting. Under BLY’s working in candlestubs bulb is exchanged at a small cost of Rs. 15 (a CFL costs Rs. 100) with a CFL by the distribution company, which gets carbon credit for its programme. Replacement of over 29 million in candlestubs bulbs under BLY helped energy saving of more than 14 million kilowatt hour (kWh) per day. It also facilitated avoiding peak demand of 1,326 Mega Watt (MW) and resulted in Rs. 55.6 million in cost savings per day as well as a reduction of 28,839 tonnes of CO₂ emissions.

The BLY scheme relaunched as Unnat Jyoti by Affordable LEDs for all (UJALA) has resulted in 55.7 million kWh of energy savings and reduced CO₂ emissions by over 45,000 tonnes.

4. The Super Efficient Equipment Programme (SEEP) under MTEE is designed to bring accelerated market transformation for super-efficient appliances by providing financial stimulus innovatively at critical points of intervention. Under this program, the ceiling fan has been identified as the first appliance to adopted. SEEP for ceiling fans aims to leapfrog to an efficiency level which will be about 50 percent more efficient.

Continued on page 2
is a fund to provide equity capital for energy efficiency projects. Energy Conservation Building Code Rapid increase in residential building stock, coupled with increase in electricity use for space cooling and heating is resulting in rapid increase in electricity use in residential buildings. Projection done by NITI Aayog indicates that electricity consumption for the residential sector is expected to increase 6-13 times by 2047. Electricity used for cooling and heating by houses and other buildings contributes 30-60 percent of the annual electricity consumption in India. Providing good insulation and ventilation in buildings will reduce electricity consumption which would in turn reduce CO2 emissions. In 2018 the government launched Eco-Niwas Samhita-1 which is an Energy Conservation Building Code for residential buildings. The code aims to promote design and construction of homes including apartments and townships to give the benefits of energy efficiency to the occupants. It sets minimum performance standards to limit heat gains (for cooling dominated climates) and to limit heat loss (for heating dominated climates) and also to ensure adequate natural ventilation and day lighting in buildings. The code is applicable to all residential use building projects on plot area of above 500 m2. The code has been developed with special consideration for its adoption by the Urban Local Bodies (ULBs) into building bye-laws. In the subsequent years, new components are expected to be added to the Eco-Niwas Samhita II, which would address other aspects such as, energy efficiency in electro-mechanical equipment for building operation, renewable energy generation, embodied energy of walling materials and structural systems. An “Energy Efficiency Label for Residential Buildings” programme was also launched in February 2019. The objective of the programme is to make a transparent instrument over the energy performance of a home that is expected to gradually lead to an effective model taken into consideration while deciding over the home prices in future. This is expected to ensure that energy performance of a home, an instrument of comparison while deciding over the home prices in the future. It also aims to provide a benchmark to compare one house over the other on the energy on efficiency and conservation standards to create a consumer-driven market transformation solution for energy efficiency in the housing sector.

The Standards and Labelling Initiative (SDLI) The BEE initiated the Standards and Labelling programme for equipment and appliances in 2006 to provide the consumer an informed choice about the energy saving and thereby the cost saving potential of the relevant marketed product. The scheme is invoked for 19 equipment and appliance including household appliances such as: lights, fans, air conditioners and pump sets and refrigerators. The energy efficiency labelling programmes under BEE are intended to reduce the energy consumption of appliance without diminishing the services it provides to consumers. Further, the standards and label for refrigerators and air-conditioners have been periodically made stringent. As a result, least-efficient products are removed from the market and more efficient products are introduced. The Corporate Average Fuel Consumption Standards (CAFC) for passenger cars has been notified on 30th January, 2014. The most recent additions to the list of labelled products are diesel pump-sets & diesel engines. Refrigerators with labels prescribed by BEE are used as a standard method to energy conservation or complement energy standards. In addition to giving information that allows consumers who care to select efficient models, BEE has prescribed labels to provide a common energy-efficiency benchmark that to work in association with other policy measures such as procurement programs, financial incentives to increase energy conservation. Under this programme the equipment maker provides information related to energy efficiency of the product on the label as prescribed in the respective product regulation, statutory order and/or schedule issued by the BEE. A star rating, ranging from 1 to 5, is in the ascending order of energy efficiency is provided to products registered with the BEE.

Demand Side Management (DSM) Schemes In order to tap the energy saving potential, Agriculture Demand Side Management (AgDSM) program was initiated by BEE with the objective to induce energy efficiency in agriculture sector by creating market based framework for implementation of few pilot projects and create awareness among end users & other stakeholders for adoption of Energy Efficient Power Projects (EEPPs). Identifying the immense energy saving potential in municipal sector, BEE initiated Municipal Demand Side Management (MuDSM). The basic objective of the project was to improve the overall energy efficiency of the ULBs, which could lead to substantial savings in the electricity consumption, thereby resulting in cost reductions/savings for the ULBs.

Implementation of the project will create a market transformation among technology provider, implementing partners and financial institutions.

Global Effort towards Energy Conservation According to a new report from the International Energy Agency (IEA) the global rate of progress in reducing energy use through efficiency measures is slowing – a trend that has major implications for consumers, businesses and the environment. According to the IEA report, global primary energy intensity (energy use per unit of Gross Domestic Product (GDP)), an important indicator of how efficiently the world’s economy uses energy, improved by just 1.2 percent in 2018, the slowest rate since the start of this decade. The rate of improvement has declined for three years in a row, leaving it well below the 3 percent minimum that IEA analysis shows is central to achieving global climate and energy goals. If the rate had reached 3 percent over the last decade, the world could have averted another $2.6 trillion of economic output - close to the size of the entire French economy - for the same amount of energy. Among reasons for the slowdown in energy conservation are a mixture of social and economic trends, combined with some specific factors such as extreme weather. At the same time, policy measures and investment are failing to keep pace with the rising energy demand. The new report includes a special focus on the ways in which digitalisation is transforming energy efficiency and increasing its value. By multiplying the interconnections...

19. PwBD candidates with less than 40% of permanent disability are not eligible. The PwBD candidates are required to submit a Disability Certificate issued by competent authority as per Persons with Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Amended Rules, 2017, failing which their candidature as PwBD candidates will not be considered.

20. Persons with Disabilities (PV, PH, P and Multipath) must be capable of performing the task assigned to them.

For candidates belonging to SC/ST/OBC/Ex-Servicemen (E SM):
- The minimum qualifying marks will be released by 5% in written test for candidates belonging to SC/PwBD categories against reserved positions.
- 3C/ST/PwBD candidates called for Written Test and Skill/Proficiency/Physical Test will be reimbursed single first class rail fare from the nearest railway station of the mailing address to the place of written test and Skill/Proficiency/Physical test and back by the shortest route on production of ticket, provided the distance is not less than 30 Kms. Fare reimbursement shall be made through on-line payment system. Candidates are advised to submit their bank details in the format along with Travelling Expenses Claim Form provided at Annexure-4 to ICC officials at the time of Written Test & SPPT for reimbursement of travelling expenses.
- SC/ST/PwBD/ESM candidates are exempted from payment of application fee.

For candidates belonging to SC/OBC/PwBD/Ex-Servicemen (E SM):
- Certificate issued by a Board of Secondary Education for passing Matriculation/Higher Secondary shall be the only acceptable document in support of age.
- Minimum 18 years and maximum age shall be 25 years for General candidates as on 01.01.2020.
- relaxation in upper age limit for SC candidates considered against reserved positions will be available.
- PwBD candidates will be allowed age-relaxation up to 10 years (Lecter 5 years for SC and 15 years for BC candidates), if considered against reserved positions.
- Relaxation to Ex-Serviceman will be allowed as per Govt. Guidelines i.e in case of ESM, Period of actual military service will be deducted from his actual age and if the resultant age does not exceed the maximum age limit by more than three years, he shall be considered to be fulfilling the age criteria.
- PwBD/ESM candidates belonging to SC/ST categories shall be eligible for grant of cumulative age relaxation under the categories.
- Age relaxation for a period equal to minimum years of experience notified against a post shall be allowed.
- Period of Apprenticeship training in an Industry covered under the experience criteria notified in the ads, relevant to a post will be considered for relaxation in age.
- Further, period of Apprenticeship training in an Industry covered under the experience criteria notified in this advt. relevant to a post may be considered as experience.

21. Compensation, perks and benefits, if applicable, will be admissible as per Indian Post Rules.

22. Procedure for filling the application forms will be intimated in due course.

23. The selection methodology will comprise Written Test and SkillProficiency/Physical Test (SPPT). The SPPT will be of qualifying nature.
4. A candidate will have to secure a minimum of 40% marks in the written test to qualify for further consideration.

5. The minimum qualifying marks in the written test will be relaxed by 5% for candidates belonging to SC/ST/Physically Challenged categories as per the norms prescribed by the Government from time to time.

6. Candidates failing to qualify in the written test will not be considered for the next stage of the selection process.

7. Shortlisted candidates will be called for Physical Test (PST). The PST will be conducted for all shortlisted candidates.

8. In case of tie of marks in the written test for the last position on the Shortlist for PST, all such candidates shall be called for the PST, even if the total number exceeds the prescribed ratio. In such a situation, interview candidates will be selected on the basis of marks obtained in the written test from out of the said short-list: only such candidates who qualify in the PST.

9. Classification-wise total list shall be drawn on the basis of marks obtained in the written test from out of the said short-list: only such candidates who qualify in the PST.

10. In case of tie of marks for the last position on the Shortlist for PST, the candidate with prior date of birth (junior by age) shall get a place in the Shortlist. However, the name of the junior shall also be retained in the said short list as the last name. In such a situation, anyone before the last position while drawing a list, the last name shall be eliminated.

11. Shortlisted candidates in the ratio of 1:2 (two candidates for one post, with due care and attention to number of reserved posts) subject to securing minimum qualifying marks in the written test, will be required to undergo a Skill/Proficiency/Physical Test (SPT). The SPT for each discipline shall be conducted by a duly constituted committee.

K. Pre-Employment Medical and Physical Fitness:

1. Candidates are advised to ensure that they are medically fit as per Indian Oil pre-employment medical standard. Candidates are advised to go through the 'Guidelines and Criteria for Physical Fitness for Pre-employment Medical Examination' and satisfy themselves of meeting the fitness criteria before they commence the selection process. The guidelines are available in the following link: [www.locorefrecruit.in/jobcenter/official_website/Preemployment_Medical.pdf]

L. Liability to Declare:

1. Candidates with reported ailments, disabilities or abnormalities and also those with finding of not meeting the physical fitness criteria as above, shall make a declaration to this effect while submitting their application.

M. General Instructions:

1. Candidates are advised to carefully read the full advertisement for details of educational qualification and other eligibility criteria before submission of online application.

2. Rules and Guidelines, as may be prescribed by the Govt., or framed by the Corporation from time to time, shall apply.

3. If any of these shortcomings is detected even after the appointment, his/her services are liable to be terminated.

2. Decision of the Bank in all matters regarding eligibility of the candidate, the stage at which such scrutiny of eligibility is to be undertaken, the documents to be produced for the purpose of interview, selection etc. and any other matter relating to recruitment will be final and binding on the candidates. No correspondence or personal inquiries shall be entertained by the Bank in this regard. The Bank does not furnish the mark-sheet of selection process to candidates.

3. Application once made will not be allowed to be withdrawn.

4. Duly filled in application form copy along with all enclosures including all supporting documents in original must be brought by the candidate for interview.

5. A recent passport size colour photograph (without dark glasses) should be firmly pasted on the application form at the prescribed place and should be signed across by the candidate. Sufficient copies of the same photograph should be retained for use at the time of interview.

6. Selected candidates, who are already in service of Government / Quasi-Government organizations, Public Sector Banks / Undertakings, must produce a proper relieving letter in original from their present Employer at the time of reporting for duty. Therefore, candidates, who are already in service of Government / Quasi-Government organizations, Public Sector Banks / Undertakings, will have to obtain prior permission / no objection certificate from their present employer before applying in NHB as per rules/regulations of their present employer in this regard.

7. For Deputation:
   (i) Process: Applications of candidates applying for deputation, should be sent through proper channel, along with Performance Appraisal Reports for the last 3 years.
   (ii) Period of Deputation: The tenure of deputation shall be 3 years, subject to annual performance reviews. This may be extended for a further period of 2 years depending on the performance.
   (iii) Only candidates willing to serve anywhere in India may apply.
   (iv) Any request for change of address / change of centre for interview shall not be entertained.

8. Candidates applying through open recruitment or on deputation basis shall have to route their applications through proper channel without which the application shall not be considered. Candidates working under the Central Staffing Scheme shall also have to obtain No-objection certificate from DOPT (Cadre Controlling Authority).

9. The Bank reserves the right to reject any application/candidature at any stage without assigning any reason and the decision of the Bank shall be final.

10. In case any dispute arises on account of interpretation in version other than English, the English version of this advertisement will prevail.

11. Any resulting dispute arising out of this advertisement shall be subject to the sole jurisdiction of courts situated at Delhi.

12. Appointments of selected candidates shall be subject to his/her being declared medically fit by Bank Medical Officer, satisfactory report about his/her character and antecedents by the Police Authorities, satisfactory report from his/her previous employer and referees, verification of caste/tribe and class certificate (for reserved category candidates only) and completion of all other pre-recruitment formalities to the complete satisfaction of the Bank. Further, such appointment shall also be subject to Service and Conduct Rules of the Bank.

13. IDENTITY VERIFICATION

At the time of interview, the call letter along with original and a photocopy of the candidate's currently valid photo identity such as PAN Card/Passport/Driving Licence/ Voter's Card/ Bank Passbook with photograph/Photo identity proof issued by a Gazetted Officer on official letterhead/Photo identity proof issued by a People's Representative on official letterhead/Aadhar card with a photograph/Employee ID/Bar Council Identity Card with photograph should be submitted to the desk for verification. The candidate's identity will be verified with respect to his/her details as in the call letter. In the Attendance List and requisite documents submitted, if identity of the candidate is in doubt the candidate may not be allowed to appear for the interview.

Note: Candidates have to produce in original the photo identity proof and submit photocopy of the photo identity proof along with interview call letter as well while attending the interview, without which they will not be allowed to attend the interview. Candidates must note that the name as appearing on the call letter (provided during the process of registration) should exactly match with the name as appearing on the photo identity proof. Female candidates who have been divorced or have had a marriage that has been annulled or declared void by a court of law or a marriage that has been declared void under the provisions of the section of the Hindu Marriage Act, 1955 which nullifies the marriage must take special care of this. If there is any mismatch between the names indicated in the Call Letter and Photo Identity Proof the candidate will not be allowed to appear for the interview. In case of candidates who have changed their name will be allowed only if they produce Gazette notification/marriage certificate/affidavit.

16. OTHER CLAUSES:

(a) Decision of NHB in all matters relating to recruitment will be final and binding on the candidate. No correspondence or personal inquiries shall be entertained by the Bank in this regard.

(b) Instances of providing incorrect information and/or process violation by a candidate detected at any stage of the selection process will lead to disqualification of the candidate from the selection process and he/she will not be allowed to appear in any recruitment process conducted by the Bank in future. In such instances, if any violation is detected during the current selection process but are detected subsequently, such disqualification will take place with retrospective effect.
1. This advertisement is issued after revising the reserved vacancies advertised earlier vide advertisement No.NIFT/Est/Recr/2019/01 due to implementation of reservation for EWS. All other matters/aspects have remained unchanged.

2. Application received against Advt. No. NIFT/Est/Recr/2019/01 will be considered as such for this advertisement. However, such applicants may also submit fresh application (with application fee) if they so desire. In the later case, their earlier application shall stand cancelled but will not be refund of fees paid earlier.

3. Cut-off date for considering eligibility will be the last date of respective advertisement against which application have been/will be received.

The Institute has five departments of studies namely Foundry Technology, Forge Technology, Manufacturing Engineering, Materials and Metallurgical Engineering and Applied Science and Humanities. Students are selected for admission through Joint Entrance Examination (JEE-Main) for B. Tech. course; through Centralized Counseling of M. Tech. (COCMT) for M. Tech. courses. Through written test and Interview for doctoral and Advanced Diploma courses conducted by NIFTFT.

Applications are invited from Indian nationals possessing good academic background along with self-motivation to quality teaching and research for faculty positions at Assistant Professor level for the following different departments from all categories (General, SC, ST, OBC & PwD).

**Sl. No. Departments**

1. Department of Manufacturing Engineering
2. Department of Materials and Metallurgical Engineering
3. Department of Foundry Technology
4. Department of Forge Technology

Applications in prescribed format are invited from interested Indian nationals possessing required qualification and/or experience for the following faculty posts.

**Sl. No.** | **Name of the Post** | **Pay Scale** | **Number of Vacancies**
---|---|---|---
1 | Assistant Professor | 10 75000 | Total-22 (Gen-08, OBC-06, EWS-04, SC-03, ST-01)*

**Notes:**

1. Faculty members of the Institute shall have teaching and research as their primary responsibility. However, they shall also exercise such other powers and perform such other duties as may be assigned to them by the Director/BOG or any other authority of the Institute.

2. All faculties are required to stay inside the campus only. In the event of the Institute not being able to provide suitable accommodation inside the campus, they will be permitted to stay outside and may be admissible in that case.

3. All the faculty are eligible to perks & allowance as per Institute/MHRD norms.

ENERGY

Continued from page 2
among buildings, appliances, equipment and transport systems, digitalisation is providing energy efficiency gains beyond what was possible when these areas remained largely disconnected. While efficiency in these areas has always had benefits for energy systems, digitalisation enables these benefits to be measured and valued more quickly and more accurately. The report points out that while digital technologies could benefit all sectors and end uses of energy, uncertainty remains over the scale of those benefits. Much will depend on how policies are designed to respond to the huge opportunities - and to the emerging challenges, most notably the risk of increased energy demand from the mushrooming use of digital devices.

Since 2015, annual technical efficiency gains in the transport sector averaged over 1 percent of total final transport energy demand. However, this gain has been offset primarily by users’ purchasing decisions and behaviour. For example, while passenger vehicles available in most markets are some of the most technically efficient in history, people are using more energy-intensive modes of transport, buying larger vehicles and travelling with fewer people per vehicle, slowing the rate of efficiency improvement. Since 2015, these structural impacts have led to additional annual increases in energy use equivalent to over 0.5 percent of total transport final demand.

A shift to more energy-intensive transport modes, an appetite for larger cars, and lower vehicle occupancy all mean that despite improvements in the technical efficiency of motor vehicles, passenger transport remains an energy-intensive sector of the economy. While technical efficiency has been improving at a faster rate in transport years, it is not increasing as fast as it could because the global vehicle fleet is ageing, as people are holding on to their cars and vans longer. Another factor affecting technical efficiency in recent years has been the shift away from diesel vehicles, which are mostly being replaced with petrol vehicles.

Conclusions

The largest improvements in energy conservation in the next two decades are projected to take place in China, India and the European Union. In India implementation of more stringent policies such as the PAT scheme and efficiency standards for vehicles are expected to make a substantial contribution. Energy conservation offers benefits at different levels of the economy. At the individual level there is improvement in health observed as a result of improved heating and cooling of buildings and air quality from more efficient transport and power generation and less demand for both.

As energy demand and bills are reduced for the poor and these households gain the ability to acquire more and better energy services, and also free up income to spend on satisfying other critical needs. At the enterprise level, as electricity utilities (discoms) improve their supply-side efficiency, they can provide more electricity to more house holds, thereby supporting increased access initiatives. Benefits for industrial firms from improvements in energy efficiency improvements include reduction in resource use and pollution, improved production capacities (Eco-efficiency), and improved operation and maintenance, which leads to improved productivity and competitiveness. At the national level investment in energy efficiency and the increased disposable income can lead to direct and indirect job creation in energy and other sectors. This makes energy efficiency an important part of governments in green growth strategies. The public budgetary position can be improved through lower expenditures on energy. In addition energy consumption subsidies in India can be reduced which means lowered government budgetary outlays to finance these subsidies.

Energy efficiency can have positive macro economic impacts, including increases in GDP, and the cumulative benefits of the above mentioned impacts of improved trade balance for energy importing countries such as India, national competitiveness, and development support. At the international level GHG emissions are reduced when energy efficiency improvements reduce demand for fossil fuel energy. If energy demand is reduced significantly across many markets, energy prices can be reduced, particularly relative to the impact of the counter-factual of increased energy demand. Improvements in energy efficiency leading to reduced demand for energy can also improve energy security across the four dimensions of risk: fuel availability (geological), accessibility (geopolitical), affordability (economic) and acceptability (environmental and social) for India and other countries.

Sushil Chandra Tripathi is Former Secretary, Ministry of Petroleum and Natural Gas, Lydia Powell is Sr. Fellow at Observer Research Foundation (ORF).

Employment News 28 December 2019 - 3 January 2020

THE SUPREME COURT

The Supreme Court has upheld the death sentence of the four accused in Nirbhaya gang-rape and murder case. Rejecting the plea of convict Akshay Kumar Singh seeking review of its 2017 judgement, a three-judge bench headed by Justice R. Banumathi said they find no ground for review of the verdict. The bench said the contentions raised by the convict were already considered by the top court in the main judgement. Meanwhile, the Government is setting up over 1000 fast track special courts for expeditious trial and disposal of rape cases, including that of minors. The scheme will cost Rs 767.25 crore rupees to the Centre and States. The Ministry of Law and Justice has formulated a scheme for setting up of the fast track courts for expeditious trial and disposal of rape cases and cases under Protection of Children from Sexual Offences (POCSO) Act.

INDIA

India had successfully test-fired two missiles - the upgraded version of Pinaka guided rocket system and the all-weather tracked-chassis Quick Reaction Surface-to-Air Missile (QR-SAM). The indigenously developed Pinaka and QR-SAM weapon system test achieved the desired accuracy by hitting the intended target with a high degree of precision and met all mission objectives. Pinaka system has a maximum range of 75 km for Mark-II variant and can fire a salvo of 12 rockets in less than 45 seconds. QR-SAM system can also engage multiple targets within a range of around 25 to 30 km with two variants and can fire a salvo of 12 rockets in less than 45 seconds. QR-SAM system has been launched after 12 months of painstaking research, analysis and testing. It is expected to be an important weapon system for the Indian Army and Air Force.

INDIAN RAILWAYS

Indian Railways has decided to grant 50 per cent concession in basic fares of Second and Sleeper Class to youths with emoluments of not more than five thousand rupees per month for travelling from one State to another. The concession will be given as a special case and it is admissible only in the normal train services and not for booking of Special Trains or Coaches.

JOB SECURITY

The government has decided to relax the norms for OCI (Overseas Citizens of India) cardholders till 30th June 2020. According to a press statement issued by the Indian Embassy in Abu Dhabi and Indian Consulate in Dubai, in case an OCI card holder is below the age of 20 years and has not got the OCI card re-issued on change of passport, he or she may travel on the strength of the existing OCI card along with the old and new passports. The Government has also decided to exempt upfront amount payable for long term lease of industrial and financial infrastructure plots by an entity having 20 per cent or more ownership of Central or State Government. The council also approved various amendments to laws which will be introduced in Union Budget 2020.

GOVERNMENT MEETINGS

The Government has announced 436 crore rupees outlay for skilling four lakh professionals in artificial intelligence, blockchain, and cybersecurity areas over the next three years. The ’Future Skills PRIME’ programme will seek to position the initiative as India stack for digital talent. Minister for Electronics and IT Ravi Shankar Prasad told reporters in New Delhi that the programme will increase employability and will add digital value to the talent pool.

INTERNATIONAL

In order to help perpetuate Mahatma Gandhi’s ideals, Portugal is launching a Gandhi Citizenship Education Prize, each year inspired by his thoughts and quotes. Portuguese Prime Minister, Antonio Costa has said the first edition of this prize will be dedicated to animal welfare as Mahatma Gandhi said that the greatness of a nation can be judged by the way its animals are treated. He said, Mahatma Gandhi’s message of tolerance and love was revolutionary in his time, and in many parts of the world it is still revolutionary today.

India and the United States have agreed to deepen the bilateral cooperation and increase defence trade. They also agreed to intensify their coordination with like-minded countries like Japan for a peaceful Indo-Pacific region and put up a decisive fight against terrorism. The second 2 plus 2 India US ministerial dialogue in Washington chalked out a pathway to take the bilateral relationship between the two countries in 2020 to a new level. A number of agreements ranging from greater interaction between elected representatives, Industrial Security Annex (ISA), for collaboration in space, science and water and people-to-people contact were signed. The two sides also inked an industrial security agreement that will allow the transfer of defence technology.

SPORTS

The second edition of the Khelo India Games will be held in Guwahati as per schedule from 10th of January 2020. Senior Assam government officials said that all preparations are being taken to make the event successful. Over 10 thousand players and officials are expected to take part in the event that will be held at different venues in Guwahati. There would be a total of 20 events in this edition of the Khelo India.

The International Hockey Federation (FIH) has unveiled a new world ranking system for 2020. It will come into effect from the first of January 2020. For a better reflection of current performances, the new ranking will be match-based instead of tournament-based calculation. The FIH said, the new world ranking system has been launched after 12 months of painstaking research, analysis and testing. It cited numerous restrictions of the tournament-based system for the change. The world body governing hockey also said that the new model removes much of the subjectivity surrounding continental weighting by creating a system which is fair to all.
