ECONOMIC PARTICIPATION OF INDIAN WOMEN

Pankhuri Dutt

Labour force participation rate is a measure of the proportion of women employed or seeking employment as a share of their working age population. According to World Bank estimates, there were 43.83 crore Indian women in the working age group of 15-64 in 2019. Using ILO estimates of the female labour force participation rate (FLPR) in 2019, there are only 9.6 crore women who are employed or seeking work. This is almost a quarter of the male labour force participation rate. On a comparative basis, India has one of the highest gender gaps among the G-20 countries and is one of the few prominent emerging economies where economic participation of women has been on a decline, particularly since 2005.

Striking rigidities in the Indian labour markets have limited the participation of Indian women in the labour force over the years. Studies suggest that demographic characteristics, educational attainment, economic status, and industry effects are the main factors for women to participate in the labour force, and the impact of socio-economic factors on women’s employment has been significant. Limited female participation in the labour force is often attributed to cultural and societal factors, with traditional gender roles and societal expectations leading to reduced female participation in the workforce.

Labour force participation is also influenced by the economic conditions of a country, with higher economic growth and development leading to increased female participation in the labour force. The rapid economic growth in India has been accompanied by increased female participation rates in the labour force, indicating a positive correlation between economic development and women’s participation in the labour market.

BUDGET 2021: AN INCLUSIVE & GROWTH-ORIENTED BUDGET

Interview with CEA

Prime Minister, Shri Narendra Modi has said that the Budget this year has a feel of reality and confidence of development and showcases India’s self-belief. He also said that it will infuse a new confidence in the world in these difficult times. In his remarks after the Union Budget was tabled in the Lok Sabha, the Prime Minister said that the Budget carries a vision of Atmanirbharata and inclusion of every citizen and section. Shri Modi explained that the principles behind the Budget include - expansion of new opportunities for growth, new opportunities for the youth, giving new dimension to human resource, infrastructure development and helping new sectors grow.

Budget 2021 saw a slew of big ticket announcements living up to the hopes and aspirations of millions of people of India. Employment News caught up with the Chief Economic Adviser of Government of India Dr. Krishnamurthy Subramanian for a brief interview on the provisions of the Union Budget. The interview is S. Ranga-bashiam, a New Delhi based News Anchor with All India Radio.

Chief Economic Adviser - The estimates announced in the Budget are very realistic. The Budget estimates have assumed a real growth of GDP of 10.5 percent during FY 2021-22, which is a rather conservative estimate compared to the 11 per cent growth projected in the Economic Survey 2020-21 and the growth forecast of 11.5 per cent by the IMF. The Budget announcements focusing on healthcare, infrastructure spending, financial sector and reforms to enhance transparency and reduce disputes’ litigation, will be pivotal in boosting investor confidence and pushing India

ECONOMIC PARTICIPATION OF INDIAN WOMEN

Effects: One such example is discussed here. Because of existing cultural and social norms, Indian women are expected to be the primary care givers to children and elderly in their families, even when they are employed. This fact is well documented through the number of hours spent on household chores. On an average, Indian women spend approximately four hours per day on household chores and in comparison, the amount of time spent by Indian men is almost 9 times less, around 25 minutes. As a result, when a woman takes up a job in the formal economy, it is often a financial decision. The wage must, at minimum, cover the cost of domestic help and caregivers that will replace her in her absence. Studies show that this phenomenon is true across countries, where women take up a job at a certain wage only if their earnings at least make up for the lost home production and associated costs, which means the female labour supply has a high elasticity to wages. This also means that the higher rate of women in the formal sector is likely to create more jobs in the care economy, which typically attracts more female workers. Moreover, studies suggest that women workers are often paid less than men. Those who engage in the informal sector often work long hours, earn less money, and have lower social status. The gender pay gap is a significant issue in many countries, and it often exacerbates existing social and economic inequalities.

COVID-19 pandemic exacerbated the gender inequality that existed in the country and eventually impacted the labour force participation rate of women globally. During the Great Lockdown, women across the world, including India, had to juggle household chores, were the primary care givers, and attended schools from home, and the elderly, while doing a full-time job. Reports suggest a decline in the number of women on the payroll of companies in the months following the pandemic. However, in the case of women entrepreneurs, majority reported an income loss due to the pandemic due to the sector specific nature of their businesses. Most women owned businesses are much smaller and operate in sectors like trade, hospitality, and retail, that were severely affected due to the pandemic. However, the government’s proactive and policy measures soon after the lockdown helped cushion this blow. Direct benefit transfers to Jan Dhan Yojana account beneficiaries targeted almost 200 million women. Wages under the Mahatma Gandhi National Rural Employment Guarantee Act (MNREGA) were increased from Rs. 162 per day to Rs. 202 a day. Studies suggest that the flexible hours and the relatively high wages of this program attract a lot of women workers in rural areas and is often the primary source of employment and income for them. In addition, the government’s provision of supplies of wheat, rice, and pulses through its public distribution system to poor households, in another instance, Aadhaar and Anganwadi workers, majority of whom are female, were provided insurance coverage. However, the closure of the formal labor market, especially in the retail sector, has led to a decline in the labor force participation rate of women in rural areas.

A positive aspect of the pandemic was that women, who typically work in the informal sector, such as domestic workers, increased their bargaining power. They were able to demand better working conditions and higher wages. However, the overall impact of the pandemic on women’s economic participation was mixed, with some sectors showing improvement and others facing a decline.

Benefits: Post pandemic, they were covered under schemes like Pradhan Mantri Jan Dhan Yojni, Mera Bharat Mahaan, and their honorariums were also enhanced.

BUDGET 2021: AN INCLUSIVE & GROWTH-ORIENTED BUDGET

Back on high growth trajectory. Given the expected multiplier effects of the infrastructure spending announced in the budget, along with the V-shaped recovery seen across sectors, tax buoyancy target of 1.1 during 2021-22 is very achievable.

EN- Budget deficit has been pegged at 9.5% for 2020-21 & 6.8% for 2021-22. Isn’t 9.5% a huge deficit. What happens to the FRBM Act?

CFA- The expansion of fiscal deficit during the times of such an unprecedented crisis is a carefully planned decision by the Government, to give the necessary impetus to economic growth. Higher GDP growth would facilitate buoyant revenue collection and thereby enable a sustainable fiscal path in the medium term. The budget underscores a gradual fiscal consolidation glide path, aiming to achieve a fiscal deficit level below 4.5% of GDP by 2020-2026. Accordingly, the FRBM Act will be amended for achieving this broad path.

The enhanced fiscal deficits in the budget also reflect the resolve of the Government to lend transparency to its accounts, by clearing the subsidy arrears and accounting them in the budget. As a result, the extra-budgetary resources have been reduced to nil in BE 2021-22.

EN- 6.8% in 2021-22, does that mean that there would be a major reduction in expenditure?

CFA- The financing of fiscal deficit during 2021-22 has been planned through a fine balance between expected uptake in the revenue collection and maintaining the quality of the expenditure. The pandemic year 2020-21 saw a sharp fall in revenues, but the revenues are expected to rebound in 2021-22. With the adoption of expansionary fiscal policy and the enhanced thrust on capital expenditure, it is expected that growth will pick up, which will yield higher revenues. This has been supported by various tax administration reform measures ranging from faceless systems to dispute settlement mechanism, which are expected to incentivize tax compliance.

In BE 2021-22, the Gross Tax Revenues are estimated to grow at 16.7% per cent over RE 2020-21 and Non tax revenues are expected to grow at 16.4% per cent over RE 2020-21. Moreover, the collection from disinvestment receipts has been pegged at Rs 1.75 lakh crore for BE 2021-22.

EN- After having undergone the global pandemic do you now think that there would be a real focus on primary, secondary & tertiary health care in the country?

CFA- Indeed, the healthcare sector has taken centre-stage due to the pandemic. The Budget recognized Health and Well being as one of the 6 crucial pillars of Atma-Nirbhar Bharat, and sharply increased its budget allocation by 137% in BE 2021-22. The Budget focused on a holistic approach towards health and well-being encompassing development of institutional capacities in primary, secondary, and tertiary health care via Pradhan Mantri- Amrit Mahotsav Swasth Bharat Yojana; improving nutritional outcomes via Mission Poshan 2.0; increasing availability of clean water and sanitation via Jal Jeevan Mission (Urban) and Swachh Bharat Mission; and taking measures to reduce pollution such as the voluntary scrapping policy to phase out old and unfit vehicles.

EN- An increase of more than 34% in Capital Expenditure pegged at 5.64 lakh crores. Can we expect this to have a huge multiplier effect on the economy?

CFA- Of course. The increased budget outlays on capital expenditure in RE 2020-21 and BE 2021-22 will boost the growth in GDP both directly, and indirectly through multiplier effects on private consumption expenditure and private investment. A study by NITI Aayog shows that a Rs. 1 increase in capital expenditure by the Government of India crowds in private investment, and leads to an increase in output by Rs 2.5. Moreover, economics research establishes that fiscal multipliers are higher during economic downturns. Thus, capital expenditure equivalent to 2.5% of GDP, as targeted in BE 2021-22, can translate into a growth of around 6% per cent in GDP. These high multiplier effects of capital expenditure will have long term benefits for the economy by unleashing a virtuous cycle.

EN- Disinvestment target has been pegged at 1.78 lakh crores. How achievable is this? Does that mean that Govt. would live up to the adage “business of Govt. is not to be in business”, atleast the non-strategic sectors?

CFA- With the expected sustained growth in the economy and the streamlined disinvestment policy laid down by the Government, this is an achievable target. It is noteworthy that the disinvestment target of Rs 1.75 crore set in the Budget for the next fiscal year, does not factor in the expected revenues from the proposed privatisation of two Public Sector Banks and a General Insurance Company in the year 2021-22.

The Strategic Disinvestment Policy of the Government does emphasise that there will be bare minimum presence of the public sector enterprises in strategic sectors. The remaining CSRs in the strategic sector will be privatised or merged or subordinated with other CPSEs or closed.

EN- A record allocation of 1.10 lakh crores for Railway will that translate into improved safety, electrification, track renewal etc.

CFA- Out of the 2021-22 BE outlay of Rs 1.10 lakh crore for Railways, Rs 1.07 crore has been allocated for capital expenditure in railways. This will enable development of railways infrastructure including electrification, track renewal etc. The idea is to reduce the logistics cost for our industry, and enhance passenger safety and convenience.
